INTERNATIONAL PRELIM. ARY REPORT ON PATENTABILITY

Box No). I	Basis of the report		
1. With other	n regard rwise in	to the language, this report is based on the international application in the language in which it was filed, unless adicated under this item.		
	This whic	report is based on translations from the original language into the following language, this language of a translation furnished for the purpose of:		
ł		international search (under Rules 12.3 and 23.1(b))		
		publication of the international application (under Rule 12.4)		
		international preliminary examination (under Rules 55.2 and/or 55.3)		
1				
furni	ished to	to the elements of the international application, this report is based on (replacement sheets which have been the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" annexed to this report):		
	The in	nternational application as originally filed/furnished		
	the de	escription:		
l	pages	, as originary meantained		
	pages			
<u> </u>	pages			
	the cla	aims:		
	pages	, as originally most trinsied		
l	pages pages	, and the second		
	pages			
		awings:		
	pages pages	, as drightary mediathished		
	pages			
		1999/1999 y tale Fidelioticy on		
	a sequ	nence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing.		
3	The ar	mendments have resulted in the cancellation of:		
1		the description, pages		
		the claims, Nos.		
the drawings, sheets/figs				
-		the sequence listing (specify):		
any table(s) related to sequence listing (specify):				
4.	(Rule	eport has been established as if (some of) the amendments annexed to this report and listed below had not been since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box 70.2(c)). the description, pages		
		the claims, Nos.		
		the drawings, sheets/figs		
		the sequence listing (specify):		
	_	any table(s) related to sequence listing (specify):		
}				
* If iten	n 4 app	lies, some or all of those sheets may be marked "superseded." BEST AVAILABLE COF.		

v.	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
l	citations and explanations supporting such statement

. Statement			
Novelty (N)	Claims	2-6, 8, 9	YES
	Claims	1, 7	NO
Inventive step (IS)	Claims	3, 6, 9	YES
	Claims	1, 2, 4, 5, 7, 8	NO
Industrial applicability (IA)	Claims	1-9	YES
	Claims		NO

2. Citations and explanations

Document 1: Microfilm of the specification and drawings annexed to the Japanese Utility Model
Application No. 97989/1990 (Laid-open No. 55770/1992) (Nissin Electric Co., Ltd.), 13
May 1992

Document 2: JP 2000-348807 A (Sumitomo Wiring Systems, Ltd.), 15 December 2000

Document 3: JP 7-24371 A (Yazaki Corporation), 27 January 1995

The inventions set forth in claims 1 and 7 lack novelty in the light of document 1 cited in the international search report. The "mark indicating the terminal metal fitting housed by the corresponding terminal storage chamber" set forth in claims 1 and 7 is disclosed in document 1 (page 5, line 20 to page 6, line 3).

The inventions set forth in claims 2, 5 and 8 do not involve an inventive step in the light of document 1 and document 2 cited in the international search report.

Document 2 (paragraph [0003], [fig. 6]) indicates that a mark (4) is made on the end face of the housing. The inventions set forth in document 1 and document 2 address

the same technical issue of "preventing incorrect insertion of terminals", therefore it would be easy for a person skilled in the art to conceive of applying the identification mark (15) set forth in document 1 to the end face of the housing.

The invention set forth in claim 4 does not involve an inventive step in the light of document 1 and document 3 cited in the international search report. Document 3 indicates that a coloring material is sprayed to form a mark. The inventions set forth in document 1 and document 3 address the same technical issue of "forming a mark", therefore it would be easy for a person skilled in the art to conceive of spraying a coloring material to form the identification mark (15) set forth in document 1.

The inventions set forth in claims 3, 6 and 9 involve an inventive step in relation to the documents cited in the international search report. None of the documents cited in the international search report indicates that a mark is provided at the edge closest to the opening on the inner surface of the terminal storage chamber, and said feature would not be obvious to a person skilled in the art.
